

**AMENDMENTS TO SPECIFICATION**

Please replace the paragraph on page 2, line 17 through 21 with the following:

*reclaim* } The 1999 Version of the Bellcore National ISDN BRI Terminal Equipment (TE) Generic Guidelines (SR-4620, Issue 1, December 1996-1998) specifies guidelines for implementing many ISDN features. Among these features is a feature known as Call Appearance.

Please replace the paragraph on page 11, line 22 through page 12, line 3, with the following:

Those skilled in the art will appreciate that the database 14 and the memory 16 may be the same memory device and that the CA data collected in the database may be forwarded to another ~~part of TE~~ part of the TE for appropriate use. It will also be appreciated that the logic may be embodied as a processor with associated program memory, as an Application Specific Integrated Circuit (ASIC), as a Field Programmable Gate Array (FPGA), as a state machine, or any other appropriate device for carrying out the methods of the invention.
